

1Pali

Our once close community is now scattered around the world. There is too much noise, misinformation and distraction adding unnecessary anxiety and confusion to an already daunting task.

We need 1 venue to ask questions, 1 trusted source to access information, 1 place to unite virtually while sharing the enormous task of rebuilding, in 1 defiant voice, that the character and feeling of our rebuilt neighborhoods will reflect the qualities we all value.

1Pali is this place.

A private, non-commercial way to connect everyone, through a simple, widely used system of neighborhood Captains virtually connected to community leaders, government departments and advisors.

At the same time, 1Pali should ensure that we have the political, financial, and legal means to defend Pacific Palisades and make things right for those who need it.

STRUCTURE
This community is built on a pyramid organization system where information is passed between neighbors and, if necessary, shared with officials. Officials can also let the neighborhood know about important updates or provide info and resources.

This structure creates order, accountability and efficiency so we can all focus on the important steps ahead on our way back home.

We have so many really smart, resourceful neighbors. It can happen. Learn more and join us.
